

# GDP per capita in Africa from 2001 to 2011

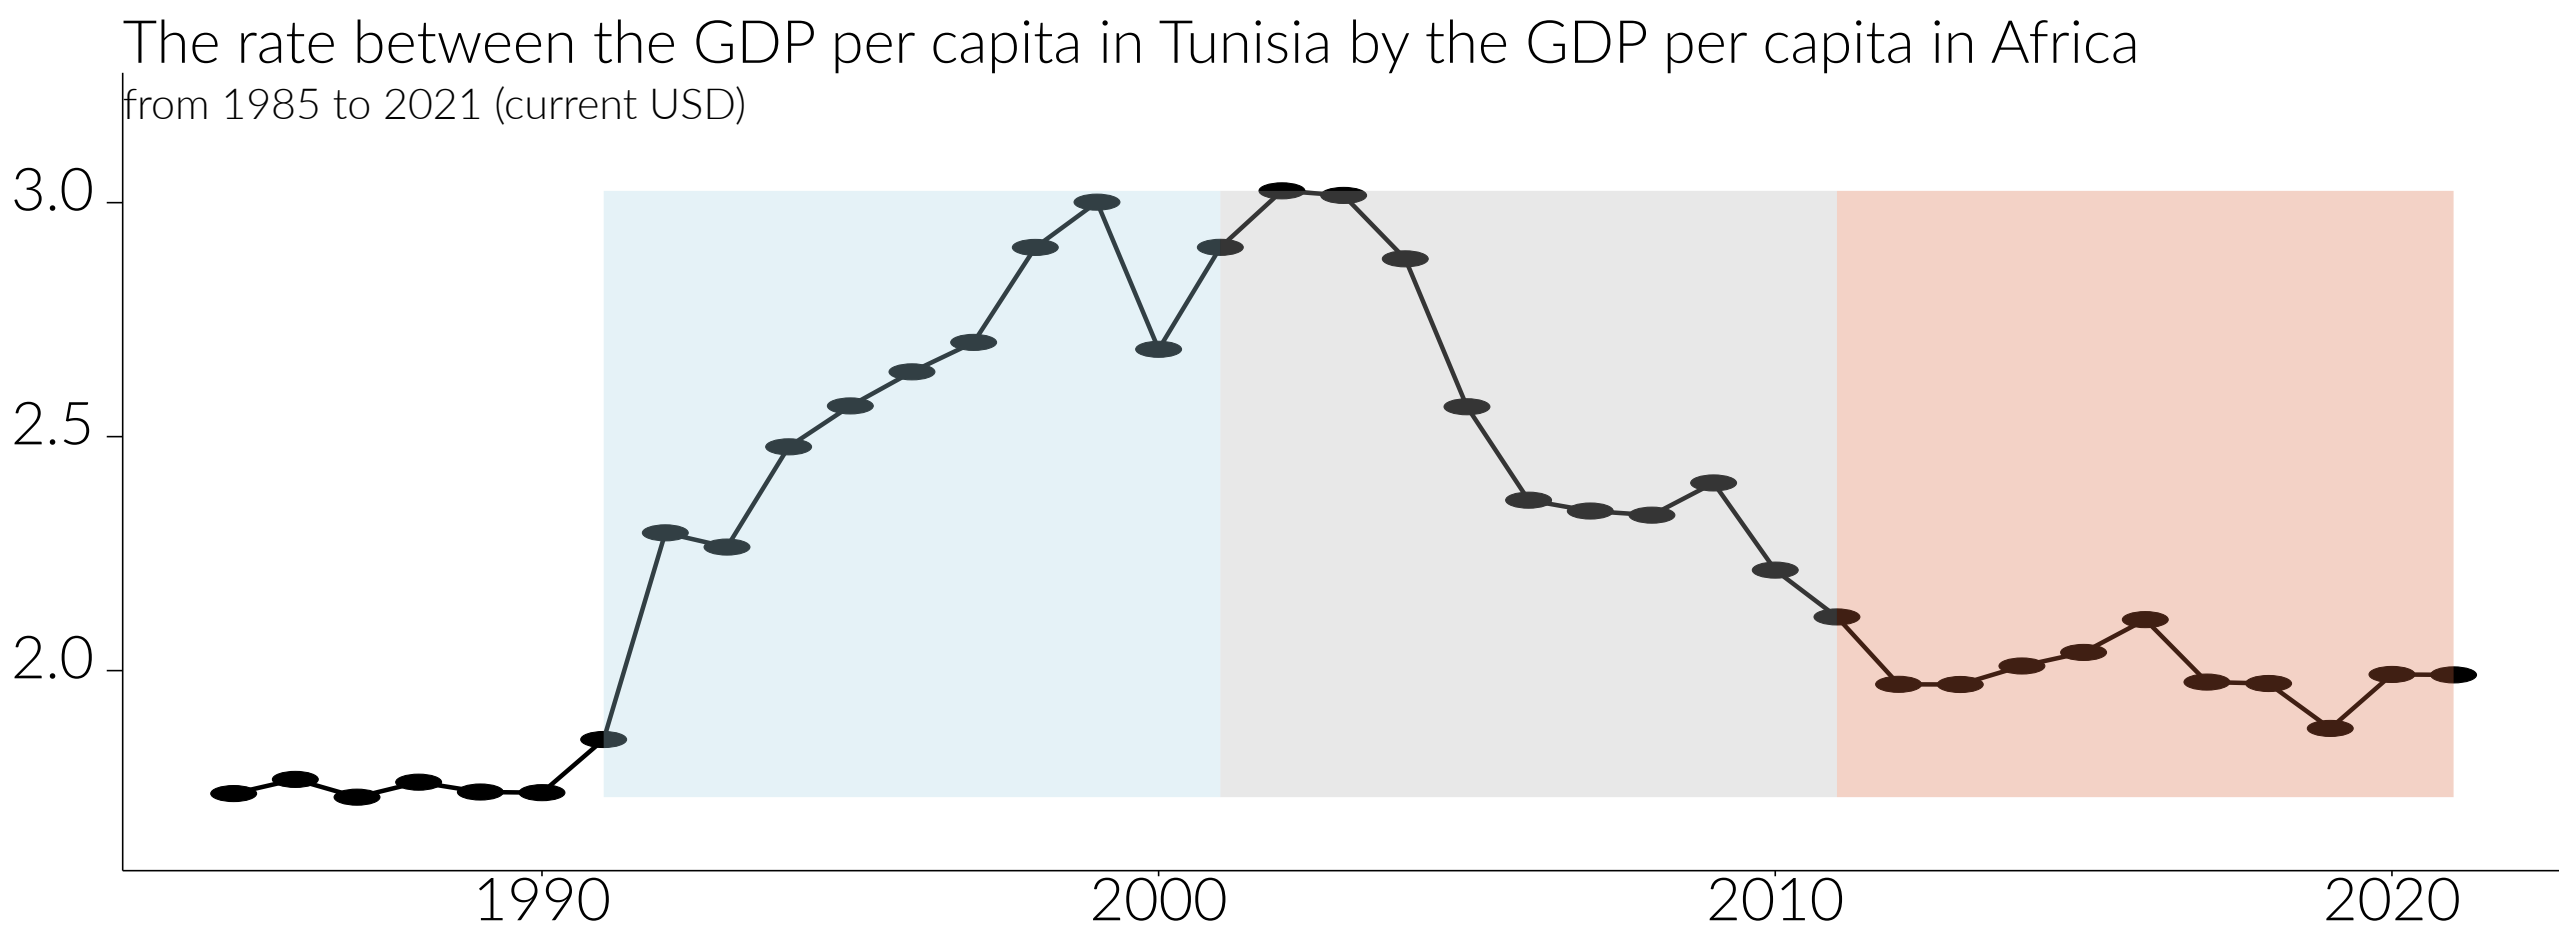

## (10 Years growth rate)

Dhafer Malouche

GDP per capita growth rate from 2001 to 2011

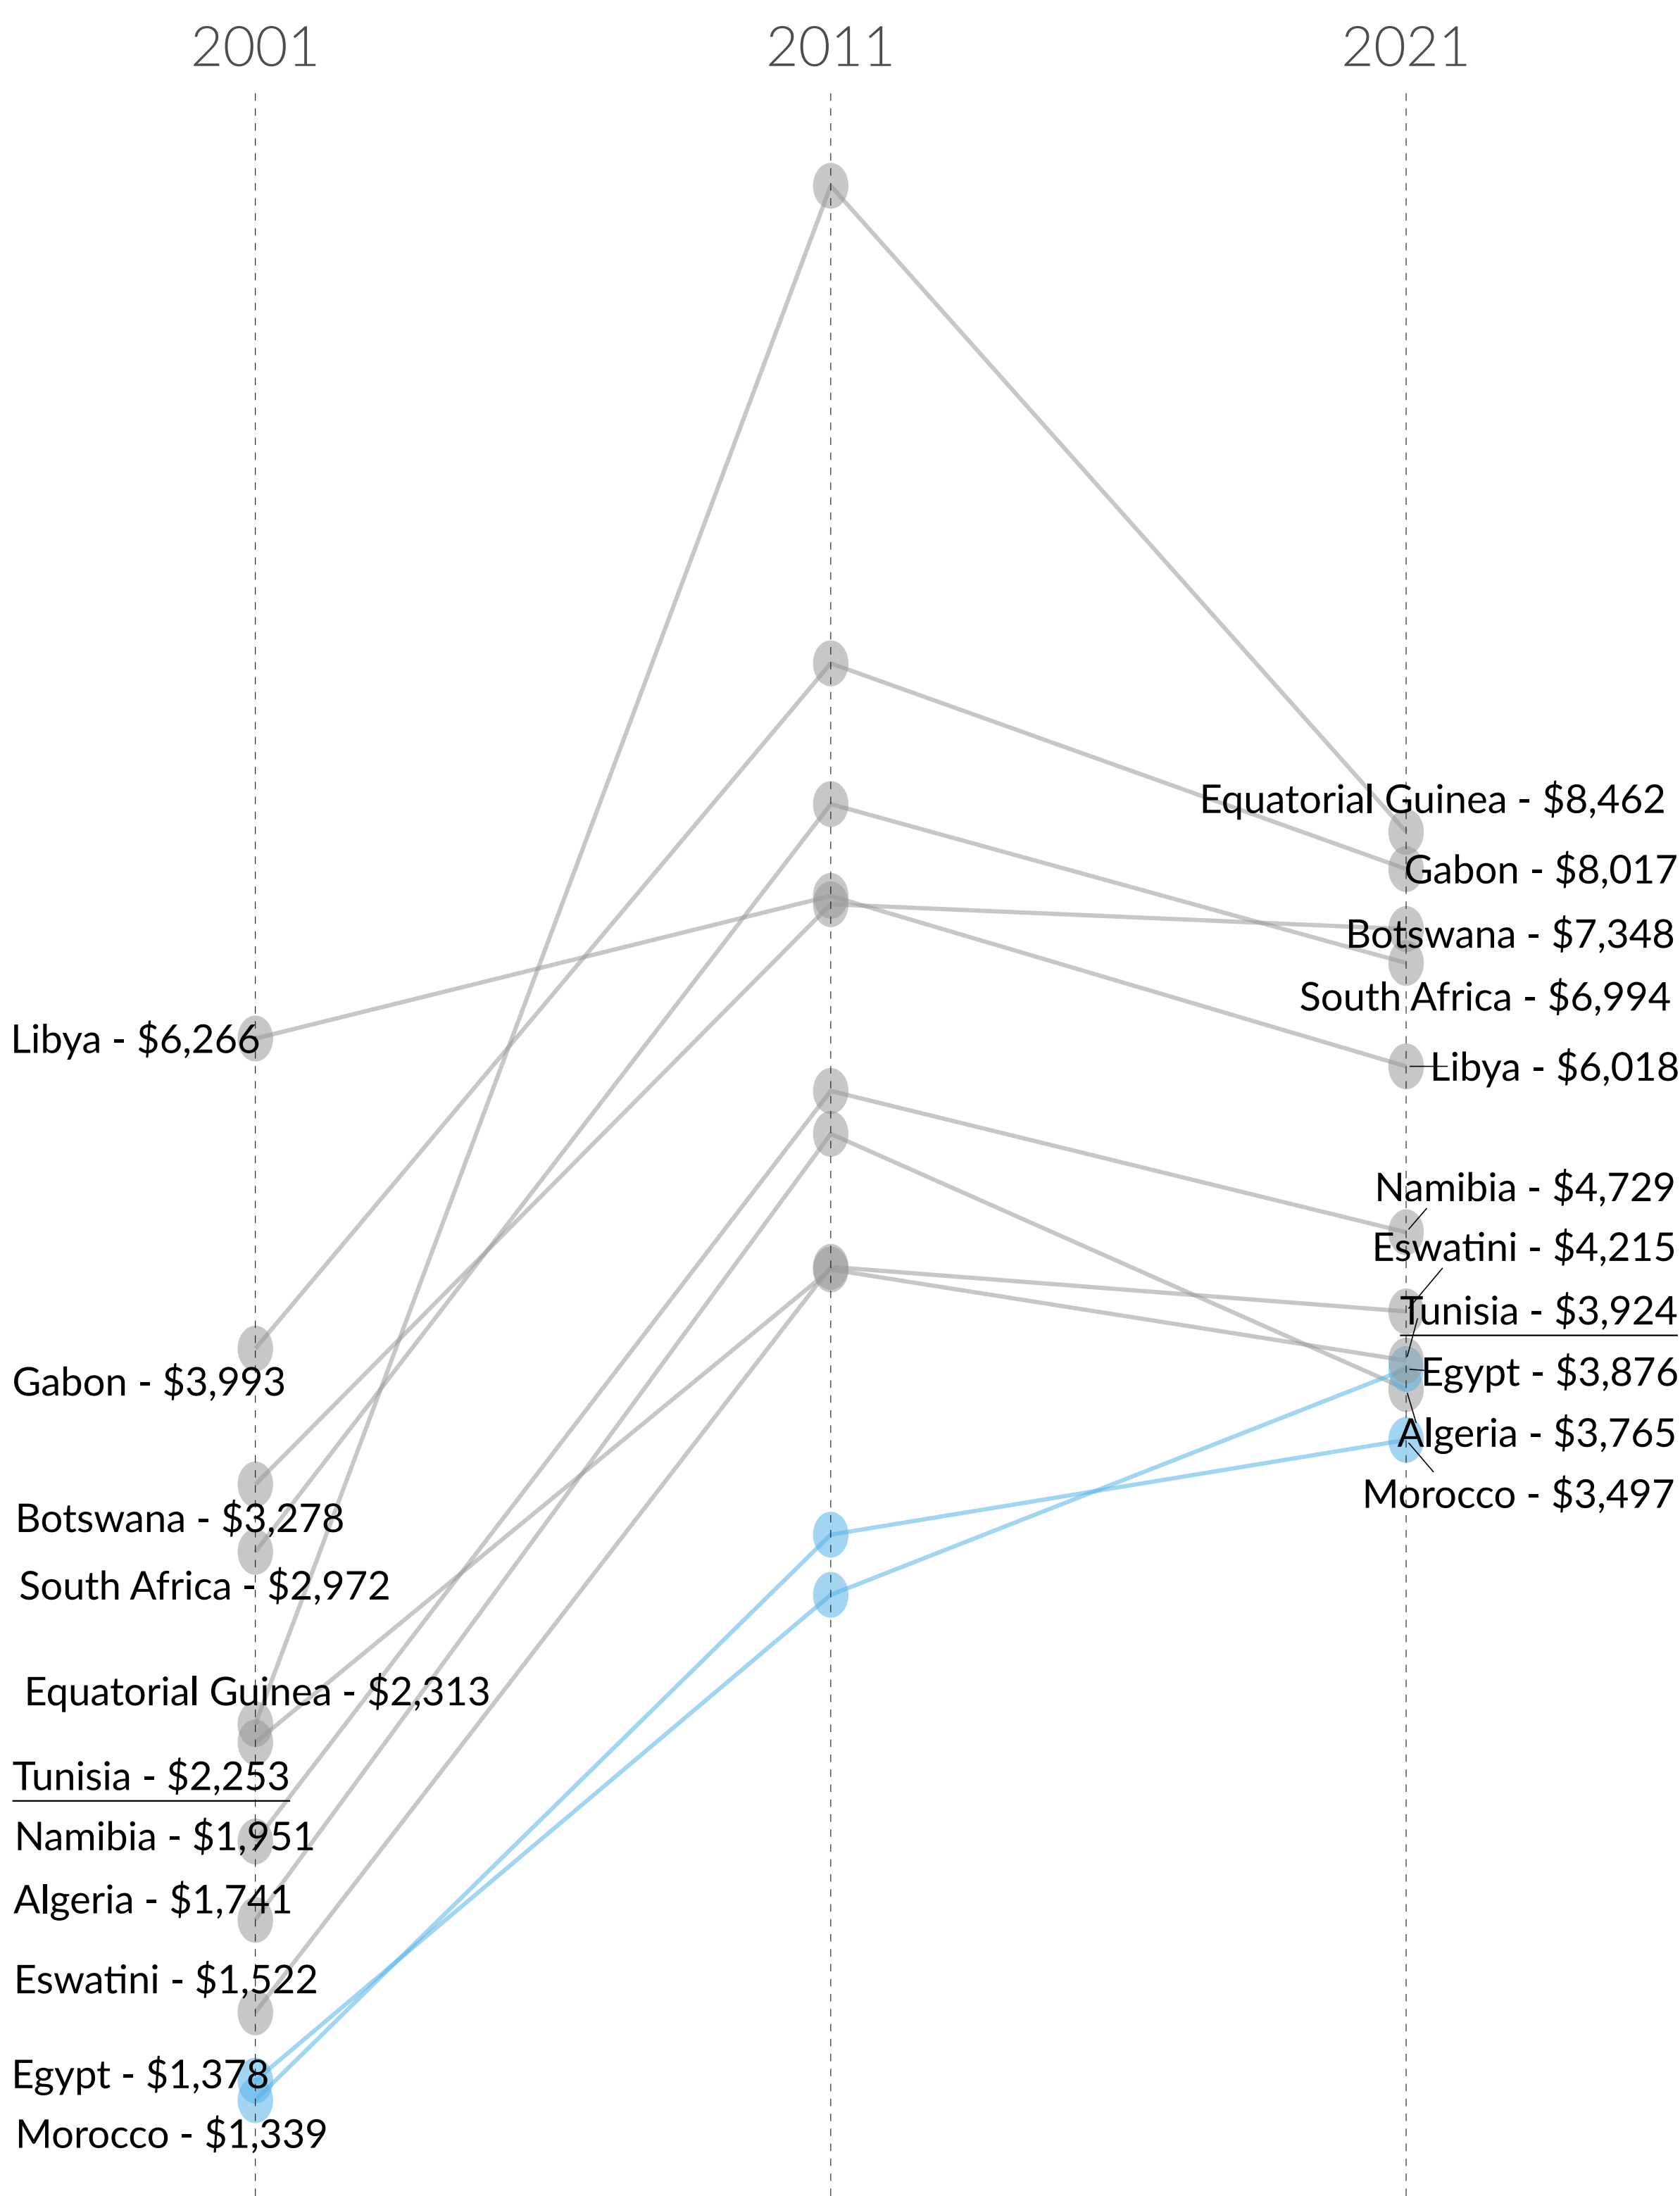

Tunisian's GDP per capita versus the African GDP per capita

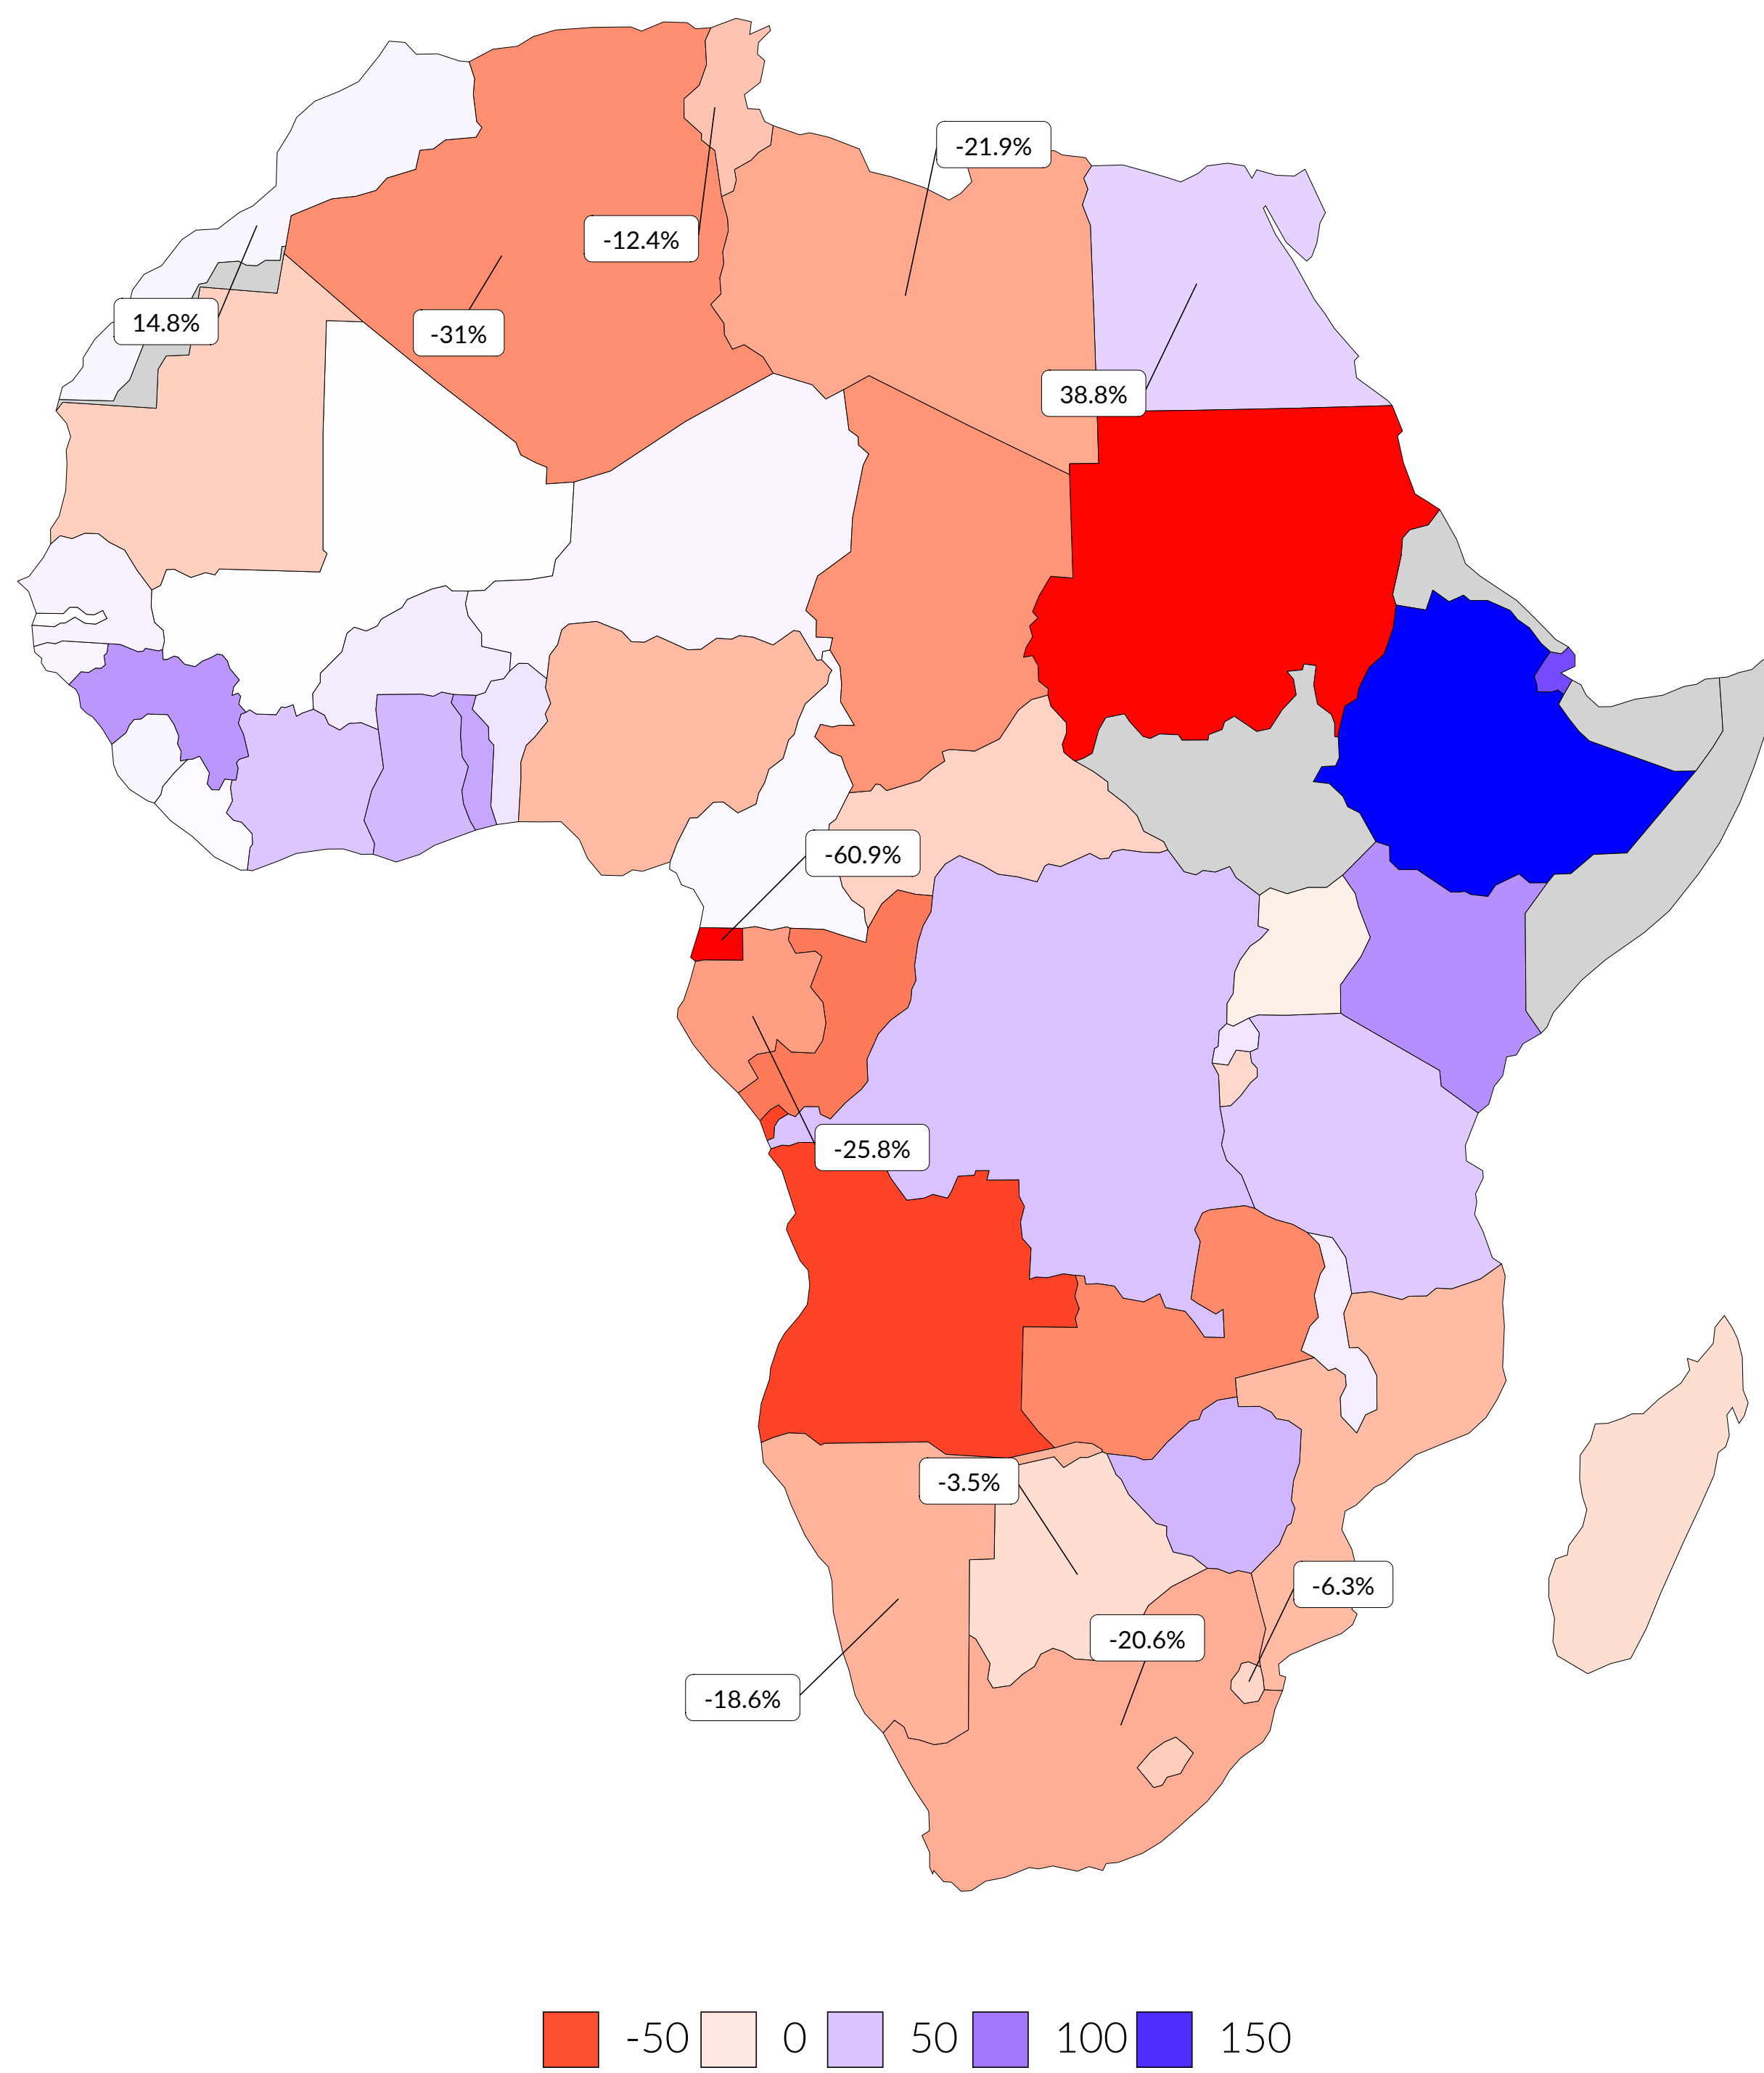

In 2002, Tunisia's GDP per capita was three times the average for African countries. However, after ten years, this rate had dropped to almost 2. From this point on, the GDP per capita in Tunisia ceased to grow.

Abstract

This poster presents a comparison of GDP per capita in African countries between 2001 and 2010 and between 2011 and 2021. The data used for this analysis was extracted from the World Bank Open Data website. The poster displays maps of Africa showing the GDP per capita in current dollars for each country in each time period. The data shows that GDP per capita in Tunisia, Morocco, and Egypt all grew significantly between 2001 and 2011 but that the growth rate slowed or reversed between 2011 and 2021. The poster invites viewers to consider the reasons for these differences in economic growth between the countries.

GDP per capita growth from 2011 to 2021

Data

The data used in this poster was carefully sourced from the World Bank Open Data website (<https://data.worldbank.org/>), a reliable and comprehensive resource for economic indicators. The poster displays maps of Africa showing the GDP per capita in current dollars for each country in each time period, allowing for easy data visualization and comparison. Through this analysis, the poster reveals trends in economic growth and invites viewers to consider the reasons behind any differences between countries.
