Last updated: September 2026

RESEARCH INTERESTS

Bayesian networks and graphical models, Biostatistics and health outcomes research, Qatar Biobank data analysis, Path analysis and causal inference, Meta-analysis and systematic reviews (Bayesian and frequentist evidence synthesis), Chronic pain and mental health modeling, Survey methodology, Quantitative analysis of regulatory frameworks, Electoral data, Educational statistics, Statistical computing and data visualization, Consumer preferences and sensory data analysis.

Citation metrics (Google Scholar, September 2026): 997 citations, *h*-index 16, *i10*-index 27 (since 2021: 463 citations, *h*-index 13, *i10*-index 17).

EMPLOYMENT HISTORY

- Aug. 2022 – present** **Professor of Statistics**, Qatar University, Doha, Qatar.
Department of Mathematics, Statistics, and Physics, College of Arts and Sciences.
Teaching (2022–present): Statistics II, Linear Algebra, Multivariate Analysis, Stochastic Processes, Actuarial Statistics I&II, Bayesian Statistics, Statistical Computation and Simulation, Bayesian Statistical Inference, Advanced Biostatistics (for Ph.D. candidates), Experimental Design and Statistical Analysis, Senior Project, Critical Thinking (Honors Program), Expertise, Experience and Exchange: tips for research methods (Honors Program). See also *Teaching* below.
- Jul. 2021 – Jul. 2022** **Professor of Statistics**, The American University in Cairo, Cairo, Egypt.
Department of Mathematics and Actuarial Science, School of Sciences and Engineering.
Teaching: Statistical Inference, Introduction to Statistics, Data Science with Python.
- 2003 – 2021** **Professor / Associate Professor / Assistant Professor**, University of Carthage, Tunis, Tunisia.
École Supérieure de la Statistique et de l'Analyse de l'Information (ESSAI).
Positions: Professor (from 2018), Associate Professor (2011–2018), Assistant Professor (2003–2011).
Teaching: Data Analysis (PCA, CA, MCA) with R; Mathematical Statistics with R; Data Mining with R; Bayesian Statistics with OpenBUGS/WinBUGS/RStan/JAGS; Time Series (ARMA, SARIMA) with R/Python; Big Data with R/Python, SQL, Spark, H2O; Advanced R/Python: data management, data visualization, dashboards, Shiny apps, Heroku apps, Bokeh.
Research: supervised 5 Ph.D. theses (swallowing-sound detection and classification, sensory analysis, genetics, zoonotic cutaneous leishmaniasis incidence, cardiovascular risk factors) and many Master and Engineering theses.
Administration: Director of the Department of Statistics (2004–2007).
- 2014 and 2019** **Visiting Associate Professor / Associate Research Scholar**, Yale University, New Haven, USA.
Whitney and Betty MacMillan Center for International and Area Studies and Department of Statistics and Data Science.
Positions: Visiting Associate Professor (2014), consulting on several projects with Yale scholars (2015–2018), Associate Research Scholar (2019).
Missions: Democratic Transition in Tunisia, Governance and Local Development (Program on Governance and Local Development, GLD, now at the University of Gothenburg): two face-to-face surveys in Tunisia; G-econ team on building local GDP data; teaching Time Series with R/Python.

- 2016 – 2017 Visiting Fulbright Scholar**, University of Michigan, Ann Arbor, USA.
Center for Political Studies, Institute for Social Research. Research on data quality, survey methodology and interviewer effects. Teaching: 4 lectures on applied graphical models, 1 on data visualization with R, 1 on sensory analysis.
- 2011 Visiting Fulbright Scholar**, Stanford University, Palo Alto, USA.
Department of Statistics. Research on graphical models, the faithfulness assumption, and covariance graphs.
- 2002 – 2003 Visiting Assistant Professor**, York University, Toronto, Canada.
Department of Statistics. Teaching: Applied Regression Models with SAS, Introduction to the Theory of Probability, Introduction to Statistics with Minitab. Research: Monte Carlo methods and Bayesian estimation of graphical models.
- 1998 – 2002 Assistant Professor**, University of Sousse, Sousse, Tunisia.
Institut Préparatoire aux Écoles d'Ingénieurs. Teaching: Analysis, Calculus, Algebra. Research: natural exponential families, Pick functions, Markov chains. Administration: Director of the Department of Mathematics.

Consulting and other appointments

- WHO Tunisia, senior data analyst consultant (05/2020–05/2021): impact of COVID-19 on psychiatric needs, hotline data.
- WARC Africa, Sierra Leone, data analyst consultant (05/2020–01/2021): online daily monitoring platform for a survey.
- Covidradar24.org / Rosettahub.com, data analyst master contributor (10/2020–12/2022).
- Fellow, Pan-African Scientific Research Council (08/2020–08/2022).
- World Bank / Program on Governance and Local Development: co-developer of the [Local Governance Performance Index \(LGPI\)](#); pilot survey in Tunisia, February 2015 (World Bank document 106241, May 2016).

EDUCATION

- Sep. 2009 Habilitation (Tenure), Statistics**, Université de Tunis El Manar, Tunisia. École Nationale d'Ingénieurs de Tunis.
Thesis: *Problèmes autour de la probabilité et de la statistique : méthodes et applications*.
Dissertation: malouche.github.io/myCV/reports.html
- Oct. 1997 Doctorate (Ph.D.), Statistics**, Paul Sabatier University, Toulouse, France.
Thesis: *Classification des familles exponentielles associées à des fonctions Pick*. Dissertation: malouche.github.io/myCV/reports.html
- 1993 – 1994 Master's Degree (D.E.A.), Statistics**, Paul Sabatier University, Toulouse, France. Applied Mathematics, Statistics.
- 1989 – 1993 Bachelor (Maîtrise)**, École Normale Supérieure de Bizerte, Tunisia.

TEACHING

All statistics courses are taught with R. The last column gives the programming and data-analysis content of each course.

Qatar University (2022 – present)

Code	Title	Level	Terms	Programming / data analysis
STAT 102	Statistics II	Undergraduate	Fall 2022; Fall 2023 (lecture and lab sections)	R (introduced to students in this course)
STAT 312	Stochastic Processes	Undergraduate	Fall 2022; Fall 2023; Fall 2024; Fall 2025 (2 sections); Fall 2026	R and RStudio throughout; R labs on Markov chains (<code>markovchain</code>), n -step transitions, simulation and visualisation, classification and absorption; since 2025, GitHub for code and submissions and GitHub Copilot in RStudio under written guidelines on responsible AI use

Code	Title	Level	Terms	Programming / data analysis
STAT 341	Actuarial Statistics I	Undergraduate	Fall 2023; Fall 2024; Fall 2025 (2 sections)	R; computing methods for aggregate claims distributions
STAT 442	Actuarial Statistics II	Undergraduate	Spring 2023; Spring 2025	R for data analysis
STAT 481	Multivariate Analysis	Undergraduate	Fall 2026	All computational work in R with RStudio; five R labs (matrix algebra, normality assessment, Hotelling's T^2 , MANOVA, PCA, factor analysis); lab reports and course project submitted as reproducible Quarto documents
STAT 482	Bayesian Statistics	Undergraduate	Spring 2026	Weekly R labs (Beta–Binomial updating, grid approximation, posterior sampling, Bayesian regression); R, Stan and WinBUGS
STAT 499	Senior Project	Undergraduate	Spring 2025; Spring 2026	Supervised projects; Spring 2026 projects built in R on NHANES data
STAT 617	Statistical Computation and Simulation	Master	Fall 2023	Advanced R programming; Monte Carlo methods, random variate generation, bootstrap, MCMC and optimisation in R; term project RStudio
STAT 626	Bayesian Statistical Inference	Master	Spring 2023; Spring 2025	Supervised thesis
STAT 690	Thesis	Master	Fall 2025	R for advanced statistical analysis; in 2025, GitHub submissions and GitHub Copilot in RStudio under written guidelines
BIOL 601	Advanced Biostatistics	Doctorate (Ph.D.)	Fall 2024; Fall 2025	R (co-taught course); GitHub submissions and GitHub Copilot in RStudio under written guidelines
BIOL 503	Experimental Design and Statistical Analysis	Master	Spring 2025	—
MATH 231	Linear Algebra	Undergraduate	Spring 2024	R
HONS 301	Expertise, Experience and Exchange: tips for research methods (Honors Program)	Undergraduate	Fall 2024; Spring 2025; Fall 2025	—
HONS 203	Mastering Critical Thinking (Honors Program)	Undergraduate	Fall 2023 (2 sections)	—

Earlier institutions

- **The American University in Cairo (2021–2022):** Data Science with Python; Statistical Inference; Introduction to Statistics.
- **University of Carthage, ESSAI (2003–2021):** Data Analysis (PCA, CA, MCA) with R; Mathematical Statistics with R; Data Mining with R; Bayesian Statistics with OpenBUGS/WinBUGS/RStan/JAGS; Time Series with R/Python; Big Data with R/Python, SQL, Spark, H2O; Advanced R/Python: data management, data visualization, dashboards, Shiny apps, Heroku apps, Bokeh.
- **Yale University (2014–2019 period):** Time Series with R/Python.
- **University of Michigan (2016–2017):** 4 lectures on applied graphical models; 1 lecture on data visualization with R; 1 lecture on sensory analysis.
- **York University (2002–2003):** Applied Regression Models with SAS; Introduction to Statistics with Minitab; Introduction to the Theory of Probability.

SUPERVISION

Ph.D. theses (University of Carthage; all completed)

- 2019-06-28** Safa AOUINTI. Statistical treatment of NGS results from IMGT/HighV-QUEST of antigen receptors (immunoglobulins and T receptors): methodology and visualization.
- 2019-06-22** Khoulood TALMOUDI JABBARI. Spatio-temporal modeling of zoonotic cutaneous leishmaniasis (ZCL) in central Tunisia.
- 2019-05-21** Hajer KHLAIFI. Preliminary study on the detection and classification of swallowing sounds.
- 2019-02-14** Olfa SAIDI. Modeling the Tunisian burden of cardiovascular diseases and diabetes.
- 2018-07-02** Ibtihel REBHI. Statistical methods for sensory and consumer data mapping.

M.Sc. theses (Qatar University)

- 2026 – 2027** Hadeel ALASHWAL, M.Sc. Applied Statistics (thesis option). Control-spectrum shift, statistical calibration, and performance portability in routine biomarker prediction of liver steatosis and fibrosis (NHANES and Qatar primary-care data). Supervisor (co-supervisor: A. Al-Khinji). In progress.
- 2025 – 2027** Muna Abdalla RAYASHI, M.Sc. Statistics (thesis option). Comprehensive health phenotyping and predictive risk stratification: an integrated machine learning approach to gender disparities in the Qatari population (Qatar Biobank). Supervisor. In progress.

Undergraduate capstone and senior projects (Qatar University)

- Spring 2026** Temporal machine learning classification of anemia status using iron biomarkers: a 20-year NHANES analysis (2001–2020). Supervisor.
- Spring 2026** Unsupervised learning and autoencoders for iron deficiency phenotyping across the lifespan: temporal patterns in NHANES (2001–2020). Supervisor.
- Spring 2026** Deep learning regression for predicting serum ferritin from demographic and dietary factors using NHANES data (2017–2018 cycle). Supervisor (STAT 499 Senior Project).
- Fall 2025** Bibliometric study of CAR T-cell therapy in lymphoma (three students). Supervisor, with A. Al-Khinji. Presented 17 December 2025.
- Spring 2025** From regional to global: Qatar University's research trajectory, 2010–2020 — a bibliometric study of ten MENA and global universities (STAT 499 Senior Project). Presented May 2025.
- Fall 2024** Predicting autoimmune status through diet and other factors using machine learning: a comparative analysis of logistic regression, support vector machines and random forests, on Qatar Biobank data (two students). Presented December 2024.

Other supervision

- University of Carthage: Master and Engineering theses on applied statistics and data science.
- Qatar University: supervisor of the two QU student research grants listed under Grants.

GRANTS

- 2024 – 2025** **Autoimmune disorders profile pre and post-COVID era**, QF-QBB-RES-ACC-00277. Prevalence and management of autoimmune diseases in Qatar; prognostic models to inform public health policy, based on Qatar Biobank data from 2015–2023.
- 2024 – 2025** **Investigating Gender Disparities in Quality of Life Across the Qatari Population**, QF-QBB-RES-ACC-00281. Health-related quality of life (HRQOL) disparities in Qatar, focusing on gender differences, using Qatar Biobank data and machine learning.
- Fall 2025** **Proteomic Signatures of Fatigue and Mental-Health Symptoms in the Qatar Biobank Cohort**, QF-QBB-RES-ACC-00178. Proteomic profiling to identify inflammatory and metabolic signatures of chronic fatigue, integrated into Bayesian networks to test pain–fatigue–mental health pathways and sex-specific profiles.
- Fall 2024** **Detecting the Undetectable: A Study on AI Tool Efficacy in Academic Writing**, QU Student Grant 2024 Cycle 2, no. 130. Efficacy of AI-detection tools in identifying AI-generated text in academic settings.
- Spring 2025** **Comparative Analysis of Research Publication Trends**, QU Student Grant 2025 Cycle 1, no. 293. Research output, citation impact and collaboration networks of leading MENA and global universities (2010–2020).

SKILLS

Languages English, French, and Arabic (strong reading, writing and speaking).

Coding R (RStudio, Quarto, Shiny, Stan), Python, SQL, Spark, H2O, Tableau, Git/GitHub, L^AT_EX.

Misc. Quantitative and qualitative research, survey design, project management, data mining, machine learning, big data, teaching, training, consultation, L^AT_EX typesetting and publishing.
